**Attention Foster Parents:**

---

March 29, 2019

Dear Foster Parents,

**RE: Family Placements**

Foster parents play a vital role in the planning process of children. A permanent home is the ultimate goal for all children in care. Foster care is intended to provide children with temporary care until they can be returned home, or reunited with family.

As a dedicated foster parent for the Agency, you and your family have provided our children with care, attention, guidance, and patience in a stable home environment. There is an attachment to the child (ren) that is natural for foster parents but also for their natural birth families.

As you are aware, a successful foster parent requires cooperation and teamwork that works with foster children and their families. This team includes the child's social worker, foster home worker, kinship worker and child's family.

As per policy the Agency will continue to explore family placements and placed children with their family in a timely manner.

As an Agency we support our families as well as our foster families—most importantly the Agency must act in the best interest of our children.

If you should have any questions or concerns regarding this letter of notification, please feel free to contact this Social Worker and or Supervisor writer at the above noted number to discuss this matter further.

**In the Spirit of Truth and Reconciliation,**

Peguis Child and Family Services
